

March 21, 2010

WASHINGTON, D.C. -Congressman Charlie Melancon (La.-03) released the following statement following Sunday's vote on health care legislation.

**"Today in the House of Representatives, I voted against the Senate health care bill and the reconciliation package. I opposed the bill for many of the same reasons that I voted against the House version of health care reform last fall: the plan costs too much and doesn't do enough to lower health care costs for middle class Louisiana families and small businesses.**

**"Providing affordable health insurance options to the millions of Americans now living without coverage is critically important. But I cannot support a plan that raises taxes for the majority of Americans who currently have health insurance, while doing little to lower their premiums or reduce their out-of-pocket health care costs. Meaningful reform would make health care more affordable for everyone - both people with insurance and those without.**

**"Whether you support or oppose this bill, we can all agree that skyrocketing health care costs are a serious problem and something must be done. I will continue working with both Republicans and Democrats to find common ground on fiscally responsible solutions that will make health care more affordable and accessible for all Louisianians."**
